		Application N .	Applicant(s)			
Office Action Summary						
		09/884,814	CHEN ET AL.			
Onice	Action Summary	Examiner	Art Unit			
The MAUL	INC DATE of this communication and	Karen Cochrane Carlson, Ph.D.	1653			
The MAILING DATE of this communication appears n the c ver she t with the correspondence address Period for Reply						
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). - Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b). Status						
1) Responsiv	ve to communication(s) filed on	<u> </u>				
2a) This action	n is FINAL . 2b) ☐ Th	is action is non-final.				
3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under <i>Ex parte Quayle</i> , 1935 C.D. 11, 453 O.G. 213.

Serial Number 09/884814 Art Unit 1653

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-3, drawn to UCP2 polypeptide, classified in class 530, subclass 350.
- II. Claims 4-15, drawn to polynucleotide encoding UCP2, classified in class 536, subclass 23.1.
- III. Claims 16(a)-20, drawn to a method for diagnosing body weight disorders via northern blot, classified in class 435, subclass 6.
- IV. Claims 16(b, c)-20, drawn to a method for diagnosing body weight disorders by assessing UCP2 polypeptide, classified in class 435, subclass 7.1.
- V. Claim 21, drawn to a method of treating obesity, classified in class 514, subclass12.
- VI. Claims 22 and 23, drawn to method of identifying a modulator of UCP2 gene expression, classified in class 435, subclass 6.

The inventions are distinct, each from the other because of the following reasons:

The nucleic acids of Invention II are related to the protein of Invention I by virtue of encoding same. The DNA molecule has utility for the recombinant production of the protein in a host cell, as recited in the Claims of Invention I. Although the DNA molecule and protein are related since the DNA encodes the specifically claimed protein, they are distinct inventions because the protein product can be made by another and materially different process, such as by synthetic peptide synthesis or purification from the natural source. Further, the DNA may be used for processes other than the production of the protein, such as nucleic acid hybridization assay.

Inventions I and Inventions IV or V are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the

Application/Control Number: 09/884,814

Art Unit: 1653

Page 3

process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP '806.05(h)). In the instant case the product as claimed can be used in a materially different process such as in either of the method of Inventions IV or V, or to make antibodies.

Inventions II and Inventions III or VI are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP '806.05(h)). In the instant case the product as claimed can be used in a materially different process such as in either of the method of Inventions III or VI, or in the recombinant production of the protein.

The product of Invention I is not used in the methods of Invention III or VI. Therefore, Inventions I and III or VI are patentably distinct.

The product of Invention II is not used in the methods of Invention IV or V. Therefore, Inventions II and IV or V are patentably distinct.

The methods of Inventions III-VI require different products and steps and have different endpoints. Therefore, Inventions III-VI are patentably distinct.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Application/Control Number: 09/884,814

Art Unit: 1653

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(l).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Karen Cochrane Carlson, Ph.D. whose telephone number is 703-308-0034. The examiner can normally be reached on 7:00 AM - 4:00 PM, off alternate Fridays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dr. Christopher Low can be reached on 703-308-2329. The fax phone numbers for the organization where this application or proceeding is assigned are 703-308-4242 for regular communications and 703-308-4242 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-1235.
